

Special Events

- Site surveys, scale drawings and 3D computer renders of the event space. Every detail is measured to ensure successful installation and operation.
- Custom set design and installation. Some set designs include floor-supported systems that totally eliminate expensive house rigging.
- Special effects including snow, haze, and fog.
- Audio systems for any venue including ballrooms, tents and even private homes.
- Lighting systems that include moving lights and LED's.
- Video equipment including projectors, HD playback and multi-camera systems.
- Expertise in multimedia presentation software and hardware.
- Custom walk-in, walk-on and atmosphere music.
- Assistance in creating and displaying power-point and embedded multi-media.
- Experience working with local area decorators and caterers.
- Architectural and outdoor lighting systems.
- Special gobo and other projection lighting effects.
- Client & event-specific pages on our website that contain all downloadable reference materials. Updated as often as necessary to inform all event partners.
